## EDUCATION

**Stevens Institute of Technology, Schaefer School of Engineering & Science**

*B.S. in Electrical Engineering*

Expected May 2030

*Hoboken, NJ*

## TECHNICAL SKILLS

**Languages:** Java, C#, JavaScript, Lua, C++, HTML, CSS

**Frameworks & Libraries:** Spring Boot, Spring Security, React, Hibernate, Lombok, Tailwind

**Infrastructure/Tools:** IntelliJ, PostgreSQL, REST APIs, Git, DBeaver, Postman, SolidWorks, Roblox Studio

## EXPERIENCE

**Software Developer & Mentor**

January 2022 – Present

*Self-Employed*

*Remote*

- Mentored students in Java, C++, and JavaScript through one-on-one programming instruction and debugging assistance
- Developed custom Discord bots, reusable software components, and workflow automations tailored to client requirements
- Diagnosed and resolved software bugs across client and student projects, improving reliability, functionality, and overall code quality

**Game Developer**

March 2020 – Present

*Roblox Development*

*Remote*

- Engineered and helped publish multiple Roblox games using Luau, including ALPHA Project Stands 2 with 1M+ visits
- Produced 10+ Roblox scripting tutorials and technical showcase videos on YouTube, reaching 1K+ total views
- Specialized in UI/UX design, server-client communication and interactive game mechanics to enhance player engagement and performance

**Teaching Assistant – Algebra II**

September 2025 – June 2026

*The Scholars Academy*

*Rockaway Park, NY*

- Supported classroom instruction by helping lead Algebra II lessons and guiding small groups through practice problems, breaking down concepts into clear, manageable steps
- Collaborated with the teaching team to analyze student grade trends and assess whether the program supported improvements in academic performance
- Organized and updated student grades in spreadsheets, recording homework and project scores and applying point deductions based on grading criteria

## PROJECTS

**Attack on Titan: Last Rising** | *Luau, Roblox Studio*

- Engineered a physics-based movement system using Roblox force instances, enabling grappling and ground sliding.
- Developed Titan NPC behaviors, including player targetting and combat actions, and contributed to player transformation mechanics and special abilities
- Programmed gameplay visual effects and their underlying logic, and debugged existing weapon systems to improve functionality and reliability
- Delivered weekly gameplay content to support ongoing storyline progression in collaboration with the development team

**Banking API (In Development)** | *Java, Spring Boot, PostgreSQL, Hibernate*

- Developed a RESTful backend with Spring Boot for managing users and bank accounts through structured CRUD endpoints
- Designed relational PostgreSQL data models and entity relationships using JPA/Hibernate to associate users with their respective accounts
- Integrated Spring Security authentication and authorization to secure account data and restrict protected API endpoints

**Superpower & Ability System** | *Luau, Roblox Studio*

- Implemented Bézier curves through repeated linear interpolation to guide particle-based effects toward the player's cursor, dynamically updating trajectories during ability activation
- Engineered 10 custom combat abilities across Cyborg and Psychic power sets, integrating ability mechanics, damage interactions, and visual effects into complete player-controlled attacks
- Built reusable modules for hit detection, damage and cooldowns, using client-server communication to render visual effects on clients for smoother playback

## LEADERSHIP & ACTIVITIES

**Chapter President** | *My Brothers Keeper (MBK) – Statewide Initiative*

September 2025 – June 2026

- Led a 40-member chapter, coordinating mentorship, academic support, leadership development, and college and career readiness initiatives while organizing programs that connected students with guidance, resources, and opportunities for long-term success

**Glow Mentor** | *Scholars Academy Mentor Program*

September 2024 – June 2026

- Mentored and supported younger students through academic and personal challenges while facilitating group activities that encouraged teamwork, collaboration, leadership, and goal-setting skills
